

REMARKS

Upon entry of the above amendments, the specification and claim 1 will have been amended, and claim 3 will have been canceled. Claims 1 and 2 are currently pending. Applicant respectfully requests reconsideration of the outstanding objection and rejections, and allowance of all the claims pending in the present application.

Initially, Applicant notes the Examiner has objected to the drawings as failing to comply with 37 CFR 1.84(p)(5) because element 7 is not illustrated in the drawings. The specification has been amended at page 2, line 7, to change "the rod 7" to -- a rod -- in order to overcome the objection to the drawings.

Accordingly in view of the above noted amendments and remarks, it is respectfully submitted that the objection to the drawings have been overcome, and Applicant respectfully requests reconsideration and withdrawal of the outstanding objection.

Applicant also acknowledges with appreciation the indication that claims 2 and 3 contain allowable subject matter on the Office Action Summary and on page 4 of the Official Action.

Applicant notes that the subject matter of claim 3 (which the Examiner has indicated as being allowable) has been added to independent claim 1. Accordingly, Applicant respectfully requests an early indication of the allowance of all of the pending claims.

Claim 1 was rejected under 35 U.S.C. § 103(a). As noted above, claim 1 has been amended to include the subject matter of claim 3 (which the Examiner has indicated as being allowable). Accordingly, Applicant respectfully submits that the rejection under 35 U.S.C. § 103(a) is improper, and respectfully requests reconsideration and withdrawal of the rejection, and an early indication of the allowance of this claim.

COMMENTS ON REASONS FOR ALLOWANCE

In regard to the Examiner's indication of allowable subject matter in claims 2 and 3 on pages 4 and 5 of the Official Action, Applicant does not disagree with the Examiner's indication that none of the cited prior art shows or teaches a driving rotary gear with a stopper as recited in claim 2, or a guide plate with a hook as recited in claim 3. However, Applicant wishes to make clear that the claims in the present application recite a combination of features, and that the patentability of these claims is also based on the totality of the features recited therein, which define over the prior art. Thus the reasons for allowance should not be limited to those mentioned by the Examiner.

SUMMARY AND CONCLUSION

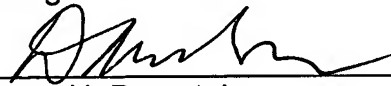

Entry and consideration of the present amendments, reconsideration of the outstanding Official Action, and allowance of the present application and all of the claims therein are respectfully requested and now believed to be appropriate.

Applicant has made a sincere effort to place the present application in condition for allowance and believes that he has now done so.

Any amendments to the claims that have been made in this amendment, which do not narrow the scope of the claims, and which have not been specifically noted to overcome a rejection based upon the prior art, should be considered cosmetic in nature, and to have been made for a purpose unrelated to patentability, and no estoppel should be deemed to attach thereto.

Should there be any questions or comments, the Examiner is invited to contact the undersigned at the below-listed telephone number.

Respectfully submitted,  
Joung-Hwan CHO
